Docket No. OON-1396 & Docket No. OOD-1598
FDA Commissioner, Dockets Management Branch (HFA-305)
Food and Drug Administration
5630 Fishers Lane, Room 1061
Rockville, MD 20852

To Whom It May Concern:

I am extremely concerned about how the FDA will handle issue of genetically engineered food. I am urging you, to please, ensure that the **FDA requires mandatory pre-market safety testing on all genetically engineered foods**. Safety test to ensure that genetically engineered food is not toxic to human health (or pet food to animal health), ensure it cannot cause allergic responses from consumption, test to see if it has lower nutritional value and if it could compromise immune responses from consumers.

In addition, the **FDA should require mandatory pre-market environmental reviews of genetically engineered food**, to ensure that the GE crops and foods will not cause irreparable damage to the environment.

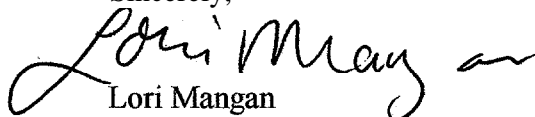

The **FDA should require mandatory labeling of GE foods**. I want to know if the food and ingredients of any food I am eating is genetically engineered what scientific testing has been done, and what the results are.

I am insulted as a consumer by the "Notification Policy" that irresponsibly ignores scientific evidence regarding GE foods. It appears that this rule is a decision made to convenience industry at the expense of public health, consumer information, and the environment,

Please get back to me and let me know the official stance the FDA plans to take on these crucial issues.

Thank you for you time and consideration.

Sincerely,

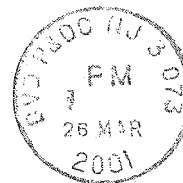

Lori Mangan
